

Caroline Halliday

I started making art around 2001, at 52, after a heart attack, and I have now completed an MA, so you can do it too!

I'm a lesbian, feminist, grandmother, and I mostly make feminist art, or follow ideas sparked off by found objects. Often I deconstruct things and give them a new meaning.. drawers, chairs, text, fairy stories. I like to engage people with the works, inviting them to climbing on things, or add to them, and I occasionally give away 'free art' on the street. I've set up many group shows, and currently co-run an artists group called FANS OF FEMINISM.
